ICEPLUS FOOD
The perfect vending machine to offer a 24/7 canteen service. IcePlus Food stores up to 30 frozen dishes that can be heated promptly thanks to an optional microwave module that activates once the product has been delivered. IcePlus Food stores food at -21°C and it dispenses it to the consumer’s hands thanks to a soft delivery elevator that avoids harsh movements and bumps.

The machine can be complimented with other Jofemar models to sell salads and cold dishes, soft drinks, snacks, desserts and coffee to provide a complete dinning menu.

ICEPLUS
The perfect solution for automated dispensing of ice-cream and frozen products. It features a cooling unit and an insulation system that keeps products constantly at -21°C, so that they do not deteriorate. It can be used on its own or become the perfect complement for the IcePlus Food machines to offer a summer menu.
