# SMART KIOSK

## Smart unattended sale solutions for the restaurant industry

The Jofemar Smart Kiosk range of products is the perfect solution to offer a smart unattended sale service in the restaurant industry and horeca sites. With this system, the customers comfortably choose their order, they pay on the spot and they only have to pick it up where specified. A simple and efficient process that guarantees a much more interactive and dynamic purchasing experience.

### ADVANTAGES

#### Client satisfaction.

- Unique digital purchasing experience as well as establishment image improvement.
- Direct communication with the final consumer. Allows offering information about allergens, nutritional values or food tips.
- Multilanguage platform.

#### Increased sales.

- The attractive product images help increase sales of the best positioned ones.
- Higher proportion of second sales. More soft drinks, desserts and snacks are sold.
- Allows building client loyalty thanks to the "Do it yourself" initiative.
- Increases service speed. Higher number of customers reached.

#### Up-sale.

- Direct promotions.
- Additional product suggestion and possibility of changing the purchase decision in real-time.

#### Avoids register errors.

- The mistakes are reduced as there are less transactions done by physical people.

#### Personnel optimisation.

- There is no need for employees to write orders or manage cash or credit card payments.
- During peak hours, employees can prepare the orders in the kitchen to speed up work and order output.

#### Queue waiting times are eliminated.

- Increased customer satisfaction.

### Totem Multimedia Kiosk (TMK)

The TMK model is the perfect solution for information desks, digital signage, and retail, as well as the perfect compliment for vending machines. Features a support and a 17-inch PC controlled screen. Additionally, ticket printer, modem, GPRS or UMTS can be fitted. Equipped to be remotely connected to another system using RJ45 Ethernet and, optionally, via UMTS modem or WiFi.

### Small Smart Kiosk (SSK)

The SSK smartkiosk ensures optimal management of any retail site, allowing an exhaustive stock control and accounting, as well as management of customer's loyalty. With a PC control based system, it is specifically designed as a selection and prepayment system for restaurants, retail or any horeca site. Features a 27" Full HD touch screen, credit card payment system, NFC payment (Short communication technology), loyalty cards reader and up-sales system. This range is fitted to manage up to two vending machines, as it greatly simplifies and streamlines operations timeouts.

### Medium Smart Kiosk (MSK)

The MSK shares features with the SSK model, but equips an innovative coin mechanism with a external recovery engine. Can simultaneously manage up to four vending machines. With a more robust design and structure, MSK is ideal for effective queue management in any environment. With a PC based management system, the MSK is fitted to equip any payment system, including banknote return. That makes it the natural evolution of the traditional POS. All of this, combined with the interactivity provided by its 27" touch screen. The perfect allied perfect for the point of sale.

### Multimedia Payment Kiosk (MPK)

In addition to all the tools and functionalities of the MSK, the MPK model, is fitted to equip a banknote recycler, which increases cash management effectiveness. The MPK model features a 32" touch screen, adaptable to different uses such as pictures and customer focused videos presentation or as attractive spaces for advertisers. The possibility of displaying advertising improves products communication to target customers, which translates into an additional income for the restaurant.
