TAOS

The best payment and control for your machines.

VANDAL-PROOF
LOCK

ENERGY-SAVING
LED LIGHTING

BANKNOTE
AND COIN MECHANISM
PAYMENT SYSTEMS

The TAOS system is the perfect solution to completely manage satellite vending machines. Features the most advanced payment systems to control up to a combination of 4 slave vendors.

This new concept allows the installation of a multi-product vending point that takes up less space and offers different payment systems. It has one of the widest ranges of payment modules on the market.

Our solution stands out for featuring a fast and intuitive system to streamline the purchasing system and improve the user experience through the implementation of interactive touch screens.

TAOS Slim. The TAOS Slim is the most suitable control unit to simultaneously manage up to 4 satellite vending machines in locations with limited space. Being the narrowest module, it allows to implement an installation that occupies less space, without reducing the offer in payment systems.

TAOS Basic. The most suitable solution for the total control of satellite vending machines. It equips the most advanced payment systems to manage up to 4 dispensing units, so they can work autonomously.

TAOS Touch 10. Control unit with integrated payment systems based on customer needs and able to manage up to 4 dispensing units. It includes a 10.1" touch screen with capacitive keyboard and offers an interactive navigation system or product selection based on categories, among others.
