Coffeemar

A break full of flavour

The Coffeemar range of hot beverages machines is the only one in the market with a pressure valve in the brewing unit to keep constant pressure during the brewing cycle. This allows extracting all the aroma and flavour of the coffee beans from the first to the last drop. Features an aluminium boiler and a motorised water distributor, eliminating most of the electrovalves, thus reducing the maintenance costs and making the operation easier.

FEATURES

- Pressure valve in the brewing unit to keep constant pressure during the complete brewing cycle.
- Aluminium boiler with resistor and capped probes, with no contact with the water (avoiding o-rings and calcium oxide formation).
- Two cup-dispenser models, depending on the cup diameter (65-67 mm or 67-69 mm).
- Adjustable stir-stick dispenser, between 75 mm and 115 mm long.
- Self-cleaning of mixing bowls, product exit and grinder assembly: manual or automatic (programmable).
- Anti-steam sugar-adding system directly into the cup.
- Constant temperature control of the water in the boiler.
- Motorised water distributor without electrovalves.
- Braking system at collection drawer.
- Coffee bean grinder assembly (own module).
- Easy cleaning and maintenance of removable elements.

STRUCTURE

- Steel cabinet treated against rust and vandal-proof lock with crowbar-resistant door integrated into the cabinet.
- 92 x 53 mm graphic display.

CREDIT MANAGEMENT

- Innovative Jofemar coin mechanism with connection for both Executive and MDB protocols, five return tubes and coin validator with the most reliable fraud-prevention systems.

PROGRAMMING

- General on site programming with the machine's keyboard, EasyFlash hand terminal, PC or modem by telemetry using J-SUITE.
- Data storage and stock control and accounting.

OPTIONS

- Self-feeding water kit (one or two 25L tanks, in the G546 model).
- Screen on the upper part of the G546 model for videos and nutritional facts.
- Water filters: anti-scale or flavour.
- Telemetry by J-SUITE
- Jofemar banknote reader.
- Jofemar J130 card/key reader or any card reader that uses the MDB protocol.
- Satellite vending machine for the model Coffeemar G546 Master.
